

IT Security Workgroup

Thursday, March 14, 2019
1:00 p.m. - 2:30 p.m.

Agenda:

Discussion Items	Notes
1. IT Security Update a) CISOA 2019	Steve Abat and Eugene Davis shared some of the information they learned at the CISOA conference. Additionally they are taking some direct actions as a result, such as limiting admin rights to specific user groups as opposed to all users.
2. Security Training Update	Proposal is going to HRAC next Wednesday though will be plan for new employees only. Cybersecurity training information is on PD website, so available to anyone interested in taking it. Still need to formalize policy/documentation surrounding training including frequency.
3. NCX Security Assessment	The work for the assessment is under way. Outcomes will help plan and prioritize even after assessment is completed. In regards to an incident response plan – we have a quote, so will make a budget request in order to be able to move forward. The next item to look into will be cybersecurity insurance -- find of if we have any coverage and if not, can we get from current provider?
4. Additional items	
Next Meeting: <i>April 11, 2019, Grossmont College; College Conference Room (10-106)</i>
